

# Christian Limbrick, Front End Developer

Houston Tx, 409-739-8804, avelimb@gmail.com

---

## PROFILE

Highly motivated software engineer with a fervent passion for building and a keen aptitude for problem-solving. With elite communication skills refined throughout my career, I'm eager to bridge technical development and user needs as a Front End Developer. [LinkedIn](#) | [GitHub](#) | [My Website](#)

---

## SKILLS

Responsive Web Design

TypeScript

Modern JavaScript

Node.js

React | Redux

Git Version Control

---

## EXPERIENCE

### NASA Image of the Day

Developed a dynamic web application in React to showcase NASA's [Image of the Day](#), utilizing Axios for streamlined data retrieval from a RESTful API. Implemented state management at the parent component level for synchronized updates across child components. Styled with Tailwind CSS for a responsive and modern UI.

### Goal Tracker Application

Combined TypeScript with React to construct this empowering [Goal Visualization](#) with a dynamic, interactive web application. This sophisticated user interface allows users to articulate and record their aspirations. Makes use of React's powerful state management capabilities and TypeScript's robust type-checking.

### Sales Commission Calculator

Utilized modern JavaScript skills in a dynamic startup environment to architect and deploy a pivotal [Commission Tracking Tool](#). This solution filled a critical gap, empowering the sales team with a reliable tool to optimize performance and revenue analytics. The app was used team wide, and pinned to the top of the Slack channel.

---
