## EXPERIENCE

### Commission Calculator

Leveraged modern JavaScript skills in a dynamic startup environment to architect and deploy a pivotal [Commission Tracking Tool](#). This bespoke solution filled a critical gap, empowering the sales team with an efficient, reliable tool to optimize performance and revenue analytics. The app was used team wide, and pinned to the top of the department Slack channel.

### Financial Management Platform

Utilized modern JavaScript techniques to engineer a dynamic [Expense Tracker](#) allowing users to define monthly budgets and seamlessly integrate daily expenses. This innovative tool was designed to enhance personal financial monitoring, particularly during travel, ensuring efficient spend analysis and budget adherence.

### Space Facts Interface

Utilized React to develop an interactive [Space Facts](#) flashcards application, enabling users to challenge and augment their cosmic understanding. Each intuitive card flips to unveil detailed insights, ensuring an engaging and informative user experience.

### Mars Mission Countdown

This [React Chronometer](#) ticks down to humanity's last ditch efforts at survival.
