

# Christian Limbrick, Front End Developer

Houston Tx, 409-739-8804, avelimb@gmail.com

---

## PROFILE

Dedicated software engineer with a strong focus on user centric design and problem solving. My background in client interaction has sharpened my ability to meld technical expertise with user needs, making me an ideal candidate for front-end development roles. ---

## SKILLS

Responsive Web Design

TypeScript

Modern JavaScript

Node.js

React

Git Version Control

---

## PROJECTS

### NASA Image of the Day

Responsive image gallery built in React to showcase NASA's [Image of the Day](#), utilizing Axios for streamlined data retrieval from a RESTful API. Implemented state management at the parent component level for synchronized updates across child components. Styled with Tailwind CSS for a responsive and modern UI.

### Currency Converter

Developed a dynamic [Currency Conversion](#) web application using React and TypeScript, showcasing expertise in modern frontend technologies and API integration. Implemented real time currency data retrieval from a third party API using Axios, coupled with responsive UI design for optimal user experience. Utilized React's state management and hooks for efficient UI updates, and enforced type safety with TypeScript, enhancing code quality and maintainability. The project highlights skills in API consumption, asynchronous data handling, and creating user centric, interactive web applications.

### Sales Commission Calculator

Utilized modern JavaScript skills in a dynamic startup environment to architect and deploy the [Commission Tracking Tool](#). This solution filled a critical gap, empowering the sales team with a reliable tool to optimize performance and revenue analytics. The app was used team wide and pinned to the top of the Sales Slack channel

---

## EMPLOYMENT HISTORY

Jan 2022 — Oct 2023

### Software Developer, Loop Insurance

Austin (Remote)

- Originally hired as a sales agent, was able to transition to the Loop Product Team after I developed the [Commission Calculator](#) web app (as seen below), adopted by the entire sales team and pinned to the department slack channel.
- Collaborated in the development of an in-house sales tool, leveraging my sales experience to bridge user needs and technical execution.
- Contributed to feature design, provided critical UI/UX feedback, assisted in beta testing, and facilitated effective communication between sales and development teams.
- Engaged in basic development tasks, ensuring the tool addressed key issues faced with the previous third-party software.

Feb 2019 — Jan 2022

### Sales Manager, Geico

Houston (Remote)

- Excelled as a sales lead, resulting in my team closing over \$20k per week in insurance premium

---

## EDUCATION

### Texas Tech University

Completed two years of coursework.
